Please find below and/or attached an Office communication concerning this application or proceeding.

		Application No.	Applicant(s)			
Advisory Action	09/764,031	KLEINLOGEL ET AL				
	, and the second	Examiner	Art Unit			
<u> </u>		James Derrington	1731			
	The MAILING DATE of this communication appe	ars on the cover sheet with the o	correspondence addr	ess		
THE REPLY FILED 16 December 2002 FAILS TO PLACE THIS APPLICATION IN CONDITION FOR ALLOWANCE. Therefore, further action by the applicant is required to avoid abandonment of this application. A proper reply to a final rejection under 37 CFR 1.113 may only be either: (1) a timely filed amendment which places the application in condition for allowance; (2) a timely filed Notice of Appeal (with appeal fee); or (3) a timely filed Request for Continued Examination (RCE) in compliance with 37 CFR 1.114.						
PERIOD FOR REPLY [check either a) or b)]						
a) The period for reply expires 3 months from the mailing date of the final rejection. The period for reply expires on: (1) the mailing date of this Advisory Action, or (2) the date set forth in the final rejection, whichever is later. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of the final rejection. ONLY CHECK THIS BOX WHEN THE FIRST REPLY WAS FILED WITHIN TWO MONTHS OF THE FINAL REJECTION. See MPEP Extensions of time may be obtained under 37 CFR 1.136(a). The date on which the petition under 37 CFR 1.136(a) and the appropriate extension fee have been filed is the date for purposes of determining the period of extension and the corresponding amount of the fee. The appropriate extension fee under (b) above, if checked. Any reply received by the Office later than three months after the mailing date of the final rejection, even if timely filed, may reduce any						
earned patent term adjustment. See 37 CFR 1.704(b). 1. A Notice of Appeal was filed on Appellant's Brief must be filed within the period set forth in 37 CFR 1.192(a), or any extension thereof (37 CFR 1.191(d)), to avoid dismissal of the appeal.						
2. The proposed amendment(s) will not be entered because:						
(a) ☑ they raise new issues that would require further consideration and/or search (see NOTE below);						
(b) ☐ they raise the issue of new matter (see Note below);						
(c) they are not deemed to place the application in better form for appeal by materially reducing or simplifying the issues for appeal; and/or						
(d) they present additional claims without canceling a corresponding number of finally rejected claims.						
NOTE: <u>See Continuation Sheet.</u>						
3. Applicant's reply has overcome the following rejection(s):						
4.[canceling the non-allowable claim(s).					
	The a) ☐ affidavit, b) ☐ exhibit, or c) ☐ request for rapplication in condition for allowance because:	<u>_</u> ·				
	The affidavit or exhibit will NOT be considered beca raised by the Examiner in the final rejection.					
7.⊵	explanation of how the new or amended claims wou) a)⊠ will not be entered or b)[ld be rejected is provided belov	☐ will be entered an vor appended.	d an		
	The status of the claim(s) is (or will be) as follows:					
	Claim(s) allowed:					
	Claim(s) objected to:					
	Claim(s) rejected: <u>11-26</u> .					
۰.	Claim(s) withdrawn from consideration:					
0.□	The proposed drawing correction filed on is a)	☐ approved or b)☐ disappro	oved by the Examine	er.		
9	9. Note the attached Information Disclosure Statement(s)(PTO-1449) Paper No(s)					
10. ☑ Other: <u>See Continuation Sheet</u>						
-						
S. Patent	and Trademark Office					

Continuation of 2. NOTE: The amendment to claim 21 that adds the limitation "prematurely interrupted leading to a porous structure..." raises issues not present at the time the final rejection was written.

Continuation of 10. Other: The remarks section of the amendement argues that the cited prior art does not show or reasonably suggest the proposed combination of sintering temperature range and a density of at least around 98%. The examiner notes however that the instant specification discloses (table at page 10) that this combination of low sintering temperature and high density results when specified amounts, i.e. 1 mol % of the second doping element are employed (Note compositions at page 9, lines 28-30. However, no current or proposed claim recites a lower limit that approaches these amounts. Currently claim 11 recites amounts that are inclusive of impurity levels or a minuscle level of the second doping element. Thus the current claims are not commensurate in scope with the showings in the specification regarding the amount of the second dopant.
